

Tasks

1. Select and upload a photo from an iPhone. Add an empty layer. Resize the background empty layer and the image, leaving an empty white rectangular area at the bottom.
2. Apply some text to the bottom of the photo inside the square underneath and choose a font.
3. Apply more text to the photo, arcing along the top of the image.

Prototype

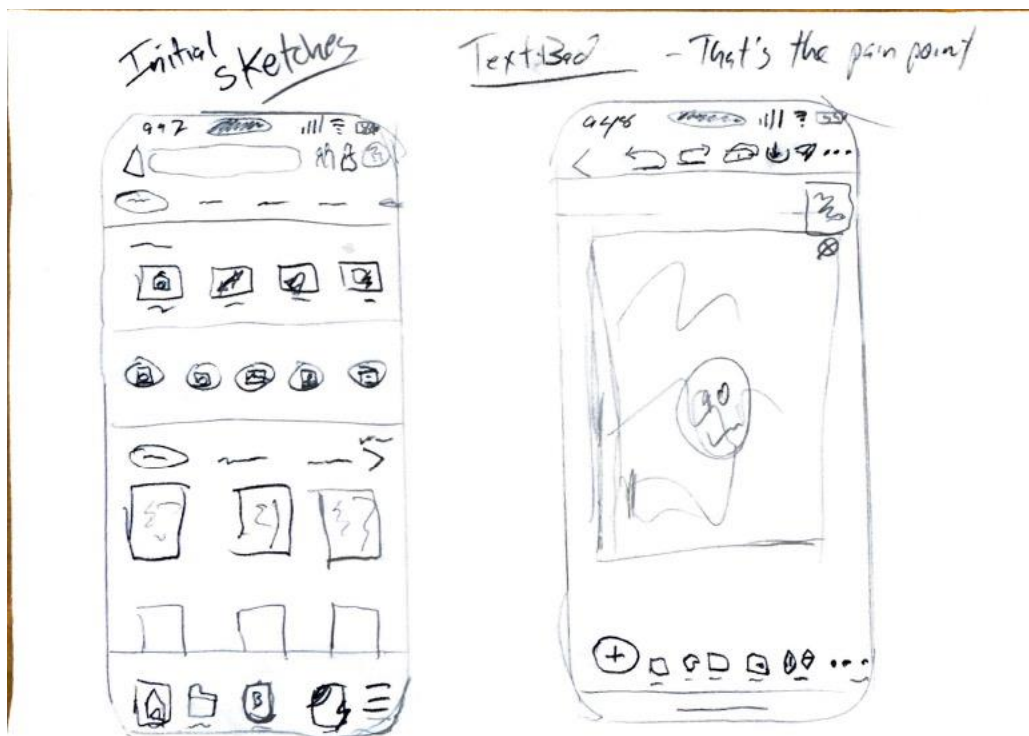

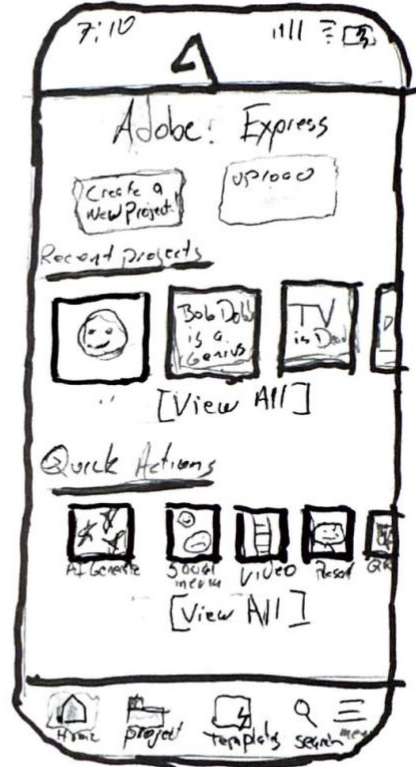

Figure 2: Initial sketches of existing Adobe Express Application.

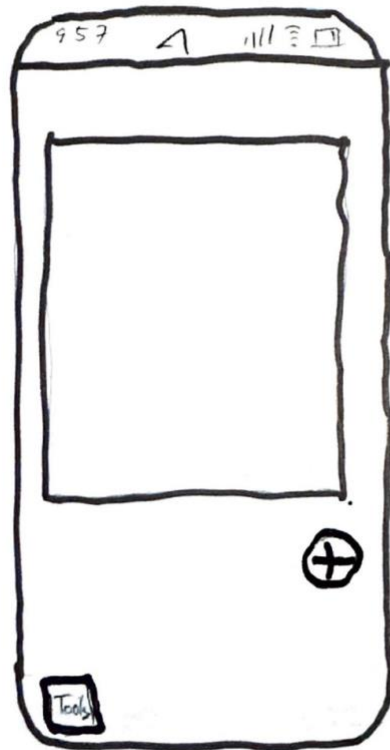

iOS Home Screen

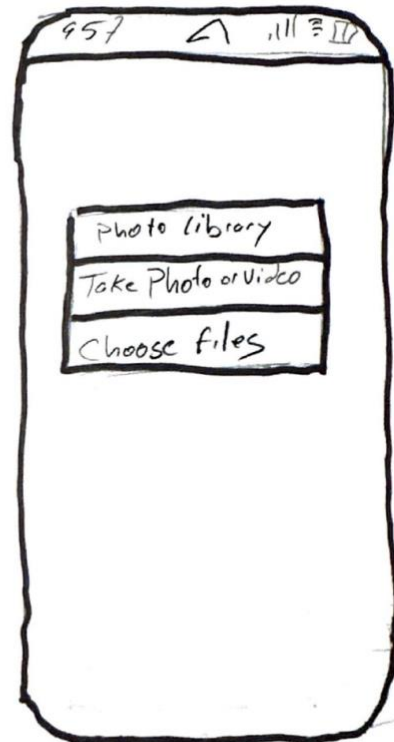

Main screen

Figure 5: Prototype Drawings. iOS home screen for orientation and Adobe Express redesigned Home screen. This is before I realized that I could scrap the buttons.
